

Devesh Saini

Mohali, Punjab, India | +91-9877219970 | devesh.saini.pro@gmail.com

[LinkedIn](#) | [Github](#)

Final-year B.Tech CSE student and an AI Engineer with project experience in full-stack development, RAG-based GenAI systems, local LLM deployment, and AI/ML applications. Seeking to pursue a career in AI Engineering.

Education

- **B.Tech in Computer Science & Engineering:** CGC Landran, 2022–2026, CGPA: 7.8
- **Senior Secondary (Class XII):** Shivalik Public School, Chandigarh | 2022 – 84.4%
- **Secondary (Class X):** Shivalik Public School, Mohali | 2020 – 84.6%

Skills

Programming: Python, Java, TypeScript JavaScript | **AI/ML:** Scikit learn, LangChain, Ollama, NumPy, Pandas, matplotlib | **Web:** MERN | **Cloud/DevOps:** GCP, Git/GitHub | **Database:** SQL, MongoDB | **Notebooks:** Google Colab, Jupyter Notebook.

Experience

Industrial Experience:

- **Freelancing:** Currently working with a US client (Q3Robotics), developing a software for restaurant management (multiple locations) that uses AI to communicate with customers and grasp the Order Details. *(Oct, 2025 - Current)*
- **Software Developer at Sedris Vision:** Built accessibility-first retail platform for visually impaired users. *(Jul, 2024 - Jun, 2025)*
- **Web Developer at Uttam Attires:** Developed an online retail store. Deployed an AI powered chatbot for better customer interactions. - *(Jan, 2024 - Jul, 2024)*

Academic Research:

- **Advancement in Blockchain:** Predicted the advancements that can be made in the current blockchain technology. Discussed Block-mesh, a 2 dimensional blockchain. Published Paper - [[Blockmesh](#)]

Extra Curricular Activities:

- Been a core member of multiple groups and organized events.
- Given tech talks: AI: a Future worth getting excited about, Cyber Security principles and architecture, and Virtual Reality and Augmented Reality.

Projects

- **CLI tool for help with Docker:** Developed a command line assistant to solve queries regarding docker.
 - **Tools & Technologies:** Python, Ollama, LangChain, ChromaDB.
 - **Github:** [devesh-saini/Semantic-Search](#)
- **RAG Agent:** Built an AI agent that uses tools for assistance.
 - **Tools & Technologies:** Ollama, ChromaDB, LangChain, Python.
 - **Github:** [devesh-saini/Terminal-Agent](#)
- **Fine-tuning model:** Currently working on fine-tuning a model on a custom dataset using QLoRA.
 - **Tools & Technologies:** Python, transformers, peft.
 - **Github:** [devesh-saini/fine-tuning-llm](#)
- **Regression Models:** Worked on various Regression models (Linear, Multiple, Polynomial, Support Vector Regression).
 - **Tools & Technologies:** Python, scikit-learn, Numpy, Pandas, Matplotlib.

Leadership and Awards

- Been chosen as Campus Technology Officer of 10x Club Student Chapter of the campus.
- Core Technical Member of Google Developers Group, CGC - COE.
- Secured 3rd position at National Science Day in Project Display Category.
